

52-74

Sweepers

DULEVO

FAYAT GROUP

TIMELESS QUALITY THROUGH PASSION

The Dulevo 52 and 74 industrial sweepers are small machines that encompass all the technology of large machines dedicated to heavy industry. Compact, attractive and with a high industrial design line, they have been conceived to be used in all environments, both civil and industrial, where a sweeper is needed that reaches everywhere without leaving traces of dirt and freeing the working environment from dust.

Perfect harmony between performance and design

The DULEVO 52/74 are a little treasure chest in which all the technologies that have made Dulevo famous throughout the world for its outstanding road and heavy-duty industrial sweepers have been introduced: very robust construction, maximum reliability, exceptional cleaning performance and dust control that is unrivalled in the world.

Collection system

The two side brushes convey dust and waste to the centre of the machine where the central cylindrical brush collects it and throws it into the container. The carefully designed geometries and the special shape of the container allow all available space inside the drawer to be utilized, so that downtime due to the discharge of collected debris is minimized.

Filtering system

Dust is sucked in and retained in the filter thanks to the vacuum created in the container itself by a suction fan with a high flow capacity and prevalence. The mechanical filter shaker allows the filter to be cleaned at any time.

Environment

Concern for the environment has always been a key driver for our company. The Dulevo 52/74 sweepers also have a feature that makes them unique in their category. These machines can be equipped with a FPTE membrane filter system, freeing the environment in which we live not only from dirt and dust, but also from the dreaded fine dust.

The Dulevo 52/74 in brief:

- 2-year warranty;
- Extremely robust chassis;
- Light and maneuverable waste container that cuts loading and unloading times;
- Flap lift control for easier bulky waste collection;
- On-board battery charger;
- Handlebar adaptable to any build;
- Brushes independently operable and easy to change without tools.

Technical data		52EH	74EH
Power supply		Battery 12V	
Cleaning path:			
- With central brush	mm	500	700
- With central and right brush	mm	700	900
- With central, right and left brush	mm	900	1.100
Waste container capacity	L	40	50
Cleaning capacity	m ² /h	4.000	5.000
PM10 certification		PM 2,5/PM10****	
Maximum speed	km/h	4,5	
Length x width x height	mm	1.316 x 720 x 917	1.316 x 920 x 917

Applications* The variety of options offered allows the operating spectrum of the Dulevo 52/74 models to be extended anywhere, anytime:

- Left side brush with independent control and rotation stop
- Tray for installation of second battery
- On-board battery charge;
- Filter with PTFE membrane.

*Some pictures and equipment may show optional extras that are not available in all markets. For information ask your nearest dealer: www.dulevo.com or info@dulevo.com

Dulevo Fayat Group

Dulevo was founded in 1976 and is now part of the Fayat Group, France's largest privately-owned construction, industrial and road infrastructure group. The knowledge of cleaning technology acquired by Dulevo, based in Parma in the heart of Italy's Motor Valley, forms the basis of our state-of-the-art and reliable machines. Our motto, 'Timeless Quality through Passion', reflects our commitment to providing innovative, high quality cleaning solutions to municipalities and industry, with a focus on environmental care.

Specifications are not binding for our company and subject to change at any time without notice.
