TIMELESS QUALITY THROUGH PASSION

BOOST 20.0

The Dulevo Boost 20.0 floor cleaning model is an ideal work tool for small commercial or artisan areas, easy to use and be stored in very tight spaces without creating clutter. The battery-operated version is equipped with a practical built-in charger that can recharge from any socket without having to create a specific charging space. On the other hand, the 220 V powered version is the best in terms of convenience. Not being restricted to the battery life, it is always ready to be used.

**BOOST 30.0**

A professional cleaning machine for a very restricted work place. Its particular design means that, despite its minimised size and weight, the brush can exert high pressure on the ground. This allows the Dulevo Boost 30.0 floor cleaning model to clean very dirty surfaces without sacrificing manoeuvrability and lightness of use. The range has been designed to satisfy all needs and is available or without motorised wheels.

**BOOST 50.0**

The various versions of the Dulevo Boost 50.0 floor cleaning model is a professional cleaning machine suitable to be used in any application – industrial to retail, logistics to public areas. In fact, it is an indisputable machine, specifically designed for average to heavy professional use. Although this is a professional tool, this floor cleaner is very ergonomic and particularly easy to use even by inexperienced people. The Dulevo Boost 90.0 is also available with roller brushes. This particular washing/sweeping version allows you to thoroughly wash any surface without having to previously clear the area from solid debris.

BOOST 90.0

A powerful and reliable floor cleaner that does not fail when hard work is to be accomplished. The design, components and ergonomics of this floor cleaner are designed for heavy industrial or domestic use. In view of its professional and prolonged use, particular consideration was also attributed to the hourly cost of operation as a key factor of productivity.
